

Kushal Nandwani - Software Developer

+91-8707077044 | knandwani27@gmail.com | Delhi, India

Overview

I have hands-on experience in developing **Full stack web applications**. I am proficient in **JavaScript, TypeScript, React.js, Next.js, React Native, Node.js, Express.js, MongoDB**, and other UI libraries such as **Redux, TailwindCSS, ShadCN**, and others. The skills I have attained from my dynamic environment and university life define me, and I look forward to refining them in any opportunities I receive.

Work Experience

Hootboard LLC | Pennsylvania, United States · Remote
Software Engineer | 08/2023 - Present

Career Highlights at Hootboard:

- Designed and implemented an automation **Selfie Print feature** for the Hootboard Selfie App, allowing users to buy mugs with their selfies via a Shopify link. Managed the project independently in two weeks. Also executed a demographic survey, achieving a **60%** user participation rate while enhancing the app's UX.
- I led the development of a **List Feature** in the Hootboard web app, enabling users to save and organize items. I managed **front-end and back-end** tasks, then implemented the feature in the Hootboard Experiences and City Guide apps for a seamless user experience. I also built the same functionality for the Hootboard mobile app, gaining valuable **React Native** experience.

Projects Beyond Work

- Pixa** - A Beautiful High-Resolution Images Downloading Web App! - [Live](#) • [Code](#)
- Chartify** - A Simple App that shows live updates of the top 10 cryptocurrencies with a chart - [Live](#) • [Code](#)
- Compound Calculator** - A Complex Compound Calculator with both yearly and monthly breakdowns - [Live](#) • [Code](#)
- Quiz App** - A High-end Quiz App which contains three different levels of difficulties - [Live](#) • [Code](#)
- WeatherWise** - A simple Weather Forecasting Web App with Live Location enabled - [Live](#) • [Code](#)
