Work Experience

React Native Developer

OffLens Tech LLP • Delhi, India   06/2025 - Present

Career Highlights at Offlens Tech LLP:

- **Led development of cross-platform and full-stack applications,** including an AI-powered tattoo design mobile app (React Native, Expo, AR Camera APIs) and a Next.js web platform, delivering pixel-perfect UI, secure authentication flows, and scalable component architecture.

- **Designed and implemented end-to-end onboarding and authentication systems,** covering login, signup, multi-step verification, refresh token handling, and intelligent redirections—ensuring seamless user access and robust session security.

- **Built personalised user experience features,** such as dynamic questionnaires, principle-based recommendation dashboards, and refined UIs for preference adjustments—translating complex inputs into actionable insights that guide user decisions.

Software Engineer

Hootboard LLC • Remote   08/2023 - 04/2025

Career Highlights at Hootboard :

- Launched an automated Selfie Print feature for Hootboard's Selfie App, enabling users to purchase mugs via a Shopify link, and decreased manual order processing time by 6 hours per week.

- Owned end-to-end enhancements for List Functionality across the HootBoard platform, including mobile app implementation, UI updates, and publish feature — involved extensive cross-platform collaboration.

- Integrated List feature into Experiences App on time and with high quality and took ownership of React Native Mobile App despite being new to the framework — quickly ramped up and delivered critical updates and new features.

Projects Beyond Work

- **Pixa** – Built a responsive image gallery web app using **Next.js 14**, **TypeScript**, **Redux**, **TailwindCSS**, and **shadcn/ui**, integrating the **Unsplash SDK**. Features include dark mode, infinite scrolling, masonry grid layout, query-based image search, and full mobile responsiveness.– **Live** • **Code**

- **Chartify** –A real-time cryptocurrency tracker displaying live updates and interactive charts for the top 10 coins. Built with **Next.js 14**, **TypeScript**, **TailwindCSS**, and **Chart.js**, featuring a clean, modern UI and responsive design – **Live** • **Code**

- **Hi-Jingo!** – A voice-enabled number caller inspired by Japanese Bingo (Tambola), generating random numbers from 1–90. Acts as a virtual game host for group play with friends and family. Built using **Next.js 14**, **TypeScript**, **TailwindCSS**, and **Redux**, with complex logic handling for fair and accurate number generation– **Live** • **Code**

- **Quiz App** – A category-based quiz platform with 3 difficulty levels, built using **React 17**, **CRA**, **SCSS**, and **react-router-dom**. Developed during college, it displays correct answers upon quiz completion for learning and review – **Live** • **Code**

- **WeatherWise** – A lightweight weather app built in 2 hours using **React (Vite)**, **SCSS**, and the **OpenWeather API**. Displays temperature and humidity based on user location or manual city input, with location auto-detection support – **Live** • **Code**
